

# For homework this term, the theme is: 'Would you like to live in a desert?'

## Geography project

Locate some of the most famous deserts on a map. Create a fact file for each of them and explain their location.  
Challenge: Can you name some of the physical features of these deserts?

A World of Possibilities

## Artwork

Create a drawing / sketch / illustration of a desert. You can create an image of what you imagine a desert to look like or you can take inspiration from a famous artist.

### You must:

- Hand in your homework on time.
- Select two activities you find the most interesting.
- Hand in date: Monday 30<sup>th</sup> March 2026

class

## Creative writing

If you were to spend a few days in a desert, what would you see and experience?  
Write a diary entry or a short narrative story detailing the adventures of someone living in a desert.

## Science Experiment

Investigate how water will evaporate more quickly in a desert with this simple experiment. Take two similar plastic bottles and fill with the same amount of water in each. Mark the water level with a permanent pen. Place one bottle on a warm windowsill and the other in a cool place (a dark corner would be good). Observe how the water level changes over time.
